All AFAA onsite training seminars are now recognized and accepted by American Council of Engineering Companies (ACEC).

The Registered Continuing Education Providers Program (RCEP) is a single comprehensive education management system for engineers, surveyors, design professionals and quality education providers. Managed by the American Council of Engineering Companies, the purpose of RCEP is to create a comprehensive registry of quality continuing education providers for engineers and related A/E/C industry professionals.

NICET and other organizations accept AFAA certificates of training and Annual Meeting participation for CEUs. Please check with your provider to verify CEU approval.
