Tom Hammerberg is an independent contractor and lives in Jasper, GA. Tom retired from the Automatic Fire Alarm Association in June 2017 and continues to present seminars nationally. He has been in the alarm industry for 44 years and was with AFAA for 23 years, serving as President/Executive Director and Director of Industry Relations. Tom is NICET Level 4 certified in the field of Fire Alarm Systems and is a Certified Fire Protection Specialist.
Basic Fire Alarm Seminar

This basic fire alarm seminar is an application course beneficial for new installers, sales personnel, service technicians, plus building and fire inspectors involved in acceptance testing and/or plans review. This course is also useful as a refresher for anyone involved with fire alarms. This seminar reviews fire alarm system fundamentals; their components; and the proper methods used to satisfy the requirements of NFPA 72: National fire alarm and signaling code, fire alarm system fundamentals, battery set calculations, initiating devices, voltage drop calculations, notification appliances, Ohm’s Law, and fire safety control functions.

COURSE OBJECTIVES

Upon completion of this basic fire alarm seminar, participants will be able to apply the proper application and installation methods required by the NFPA 72-2016, NEC 2014

Who Should Attend?

- Fire and Building Officials
- Technicians Installers
- Sales and Service Personnel

Materials We Provide

- Student Workbook

Materials Students Provide

- Students should bring the respective editions of NFPA-72 and NFPA-70
