Prep for NICET Levels 1 & 2 Seminar 1 or 2-day Course Outline (7 or 14 hours)

Course Description

In this course, participants will take an in-depth look into the codes and standards referenced by NICET for fire alarm certification. The course is designed for anyone considering or preparing to take a certification exam or simply seeking additional knowledge of the codes and standards governing fire alarm design, installation and general work practices. The interactive nature of the course delivery and practical exercises will improve participants knowledge of the use and application of NFPA 72, the NEC, and the building and fire code requirements for fire alarm systems. In addition, attendees will have the opportunity to dialogue with instructors familiar with the certification and testing process.

Learning Objectives

At the conclusion of the course, participants will be able to:

Understand the purpose, scope, structure, layout, and application of NFPA 72-2016, the NEC (2014 edition) and the 2015 edition of the International Building Code.

Distinguish between codes and standards and how those differences apply to certification.

Recall where to locate information within the codes and standards referenced by NICET.

Recognize proper wiring methods as required by the NEC.

Prepare simple shop drawings after assembling basic project information.

Course Length

1 or 2 days (7 to 14 hours total – 7 hours per day) – Students must attend entire one- or two-day seminar to receive credit.

Course Outline

Day One

1. NFPA 72 “pre-quiz”
2. Layout of NFPA 72
3. Fire alarm requirements from the NEC
4. Review of the NICET CBT process
5. “Post-quiz”

Day Two

1. Introduction to codes vs. standards
2. Format of International Building Code
3. Changes between editions
4. General fire alarm requirements
5. Specific fire alarm requirements
6. Practical exercises
