NFPA 101-2015 Fire Alarm Requirements Seminar

Course Objectives

This seminar is beneficial for designers of fire alarm systems, project managers, or lead installers responsible for fire alarm systems and authorities having jurisdiction responsible for fire alarm system plan review and/or acceptance testing. Discussions of general and specific requirements for fire alarm systems and practical exercises intended to improve the participant's knowledge of how to use the building/fire codes for determining fire alarm requirements. This seminar is based upon the 2015 edition of NFPA 101. Participant must attend entire seminar to receive 7 hours of continuing education credit.

Who Should Attend?

Fire and Building Inspectors
Plan Reviewers
Contractors
Designers

Materials we provide

- Student Workbook

Carbon Monoxide Detection Seminar

This seminar focuses on new requirements for Carbon Monoxide detection in the 2015 NFPA 101, Life Safety Code and the 2015 International Residential Code, current legislation requiring CO detection, and a review of the requirements of NFPA 720-2015, Standard for the Installation of CO Detection and warning equipment, IBC-2015 and NFPA 101-2015 Life Safety Code

Course Objectives

Upon completion of this seminar, each participant will be able to understand what carbon monoxide is. Participants will be familiar with building code and installation requirements based upon current legislation regarding carbon monoxide detection. Participants must attend the entire seminar to receive 7 hours of continuing education credit.

Who Should Attend?

Fire and Building Officials involved in witnessing Acceptance and Reacceptance Tests
Installers performing Acceptance and Reacceptance Tests
Technicians performing periodic tests and inspections

Materials we provide

- Student Workbook
